

FOLDAWAY

**Space-saving design,
optimal sustainability:
the ultimate foldable crate**

Space-saving

the most compact foldable crate ever created

- Lowest stacking height on the market, takes up to 20% less space
- Optimal internal volume and best weight/internal volume ratio: save on transport costs
- Perfectly inter-stackable with Euro-norm size, flawless compatibility in your supply chain
- Easy unstacking thanks to smart handles

Production quality

- Made of high-quality, sturdy HDPE (High Density Polyethylene)
- Excellent resistance to cold temperatures, even below freezing (-30 to +80 °C).
- Customisation and/or identification: via in-mould label tags, featuring your barcode or company logo

Optimal sustainability

- Robust: reusable many times
- The first crate that is 100% recyclable: completely made of 1 type of raw material (including labels)
- Produced with 100% green energy

Actively contribute to a circular economy and reduce your environmental impact.
